SKILLS

Programming Languages: Python, SQL, TypeScript, JavaScript, R, VBA, DAX

Tools & Technologies: Power BI, Excel, Power Query, Databricks, Salesforce, SharePoint, React, Node.js, Express, Git/GitHub, Power Automate, Zod

Core Competencies: LLM-supported development, workflow automation, data visualization, forecasting, process improvement

Professional Skills: Stakeholder communication, analytical problem-solving, leadership, adaptability

Languages: English, Hindi, Spanish

EDUCATION

University of Waterloo

Bachelor of Applied Science in Management Engineering

Waterloo, ON, Canada

September 2024 – Present

Cumulative GPA: 3.9/4.0 (89.48%) | Dean's List: F2024, W2025

EXPERIENCE

Brookfield Asset Management

Incoming Data Engineer, Data Analytics and Automation

Toronto, Canada

September 2026 – December 2026

- Incoming Fall 2026 Co-Op

Manulife Wealth

Data Analyst, Retail and Wealth Operations

Waterloo, Canada

January 2026 – April 2026

- Built scalable Power BI reporting infrastructure using Salesforce data queried through Databricks (SQL) and internal operational datasets to centralize reporting and offer leadership insights into workload, productivity, and service trends.
- Developed drill-through advisor and case analytics in Power BI to investigate workload concentration, ownership patterns, and high-priority areas, enabling managers to identify productivity gaps, prioritize resources, and inform workload management and retention decisions.
- Automated monthly reporting and document review workflows using Power BI, SharePoint, and Power Automate, reducing manual effort in recurring slide creation and monitoring by 100%.

Manulife

Business Analyst, Department of Regional Transformation

Singapore, Singapore

May 2025 – August 2025

- Designed and deployed a workforce planning and forecasting framework by integrating siloed data sources in Excel & Power Query, enabling leaders to align staffing with demand through a single, reliable system.
- Engineered process analysis templates and tools using Excel to classify value-added vs. non-value-added work, quantify lost capacity, and highlight efficiency gains for cost and utilization improvement.
- Built dynamic forecasting, capacity, and shrinkage models incorporating demand growth, peak workload scenarios, automation impacts, demonstrated vs. effective throughput, and role-based buffers to project multi-year FTE requirements and surface bottlenecks and performance ceilings.

Harmony Meadows Alpaca

Project Team Member – Data Analyst

Waterloo, Canada

July 2025 – August 2025

- Directed a project team to deliver a market research dashboard, coordinating research, data analysis, and visualization to support wholesale expansion strategy.
- Built automated Excel and Power Query pipelines to clean and merge Shopify exports with external benchmarks and designed interactive Power BI dashboards providing insights into market size, consumer demand, sales trends, and growth potential.

Singapore Police Force

Assistant Group Leader, Public Transport Security Command

Singapore, Singapore

April 2022 – February 2024

- Led and developed future team leaders through structured training and mentorship while coordinating patrol operations and incident response, strengthening operational readiness and ensuring consistent execution in public transport security operations.

PROJECTS

RecipeFlow | *TypeScript, React, Express, Zod, Tailwind CSS*

June 2026

- Built a local-first Chrome extension that extracts recipe content from active browser tabs and sends it to a secure local TypeScript/Express backend for structured processing, validating generated recipe data with Zod.
- Developed a React/Tailwind cooking workspace with serving scaling, ingredient checklists, step-by-step instructions, timers, shopping lists, and contextual substitution assistance.

SnapRSVP: Rapid Serial Visual Presentation Desktop App

May 2026

- Built a macOS desktop app using Python, PyQt6, MSS, Tesseract OCR, PyInstaller, and PDF parsing to capture on-screen text or PDFs and convert them into a rapid serial visual presentation (RSVP) overlay for faster reading and reduced visual distraction, supporting reading speeds of up to 800 WPM for dense text.

Financial Planning Tool

November 2024

- Built an Excel-based financial planning tool using VBA automation and What-If analysis to streamline expense tracking, budgeting, and scenario evaluation, refining usability through iterative user feedback.
